

ANALOG DIGITAL INTL INC, is a value-added reseller for the VidyoConferencing™ product line. The innovative VidyoConferencing™ products deliver high-quality interactive HD video at a lower cost ... over general-purpose IP networks like the Internet. No expensive dedicated “hardware” video endpoints – No specialized QoS enabled IP network is required to participate in HD Telepresence-quality multi-point video conferences. Use standard PC and Macintosh computers, webcam, headset or USB speakerphone is all that is required.

How is this possible? VidyoConferencing™ products are built on top of a better technical foundation called the H.264 Scalable Video Coding (SVC) standard. From the home-office desktop or laptop up to the dedicated corporate video-conferencing room system there is a seamless and easy to use solution for organizations of all sizes.

VidyoConferencing™ products take advantage of your organization’s existing IP infrastructure and computers. No dedicated networks are required. And yet Vidyo still manages to surpass the quality of most video communications solutions at just a fraction of the cost.

The VidyoConferencing™ product line contains:

- ✚ VidyoPortal™ is a Web-based environment used to initiate meetings from anywhere. Users can initiate direct calls or invite others to multi-point conferences. Browse to VidyoPortal, login and call other users. SIMPLE.
- ✚ VidyoDesktop™ is the software client that gets installed on your PC or Mac the first time you connect to the VidyoPortal.

- ✚ VidyoRoom™ is designed for your organizations conference room where several people will attend a video conference at once. The entry level VidyoRoom HD–100 encodes 720p & 30 fps, yet decodes HD at 60 fps. The HD–100 can display a shared application on a second monitor. The top-of-the line VidyoRoom HD–220 can deliver up to 1080p at 60 fps with support for dual HDMI monitors.
- ✚ VidyoRouter™ is the heart and brain of the VidyoConferencing™ system. Intelligent video routing allows for cost efficiencies available through Internet bandwidth utilization. Encoding and decoding occurs only at the endpoints – leaving just video routing to be accomplished within the network itself.
- ✚ VidyoGateway™ is an optional device for connecting to legacy H.323 video endpoints like Sony®, Tandberg®, Polycom®, LifeSize® or other MCU based systems. The inexpensive VidyoGateway™ allows you to utilize any existing video conferencing investments your organization may have already have made.
- ✚ VidyoOne™ delivers all of the hardware and software components required for desktop conferencing in a single 1U appliance at a single fixed price, making it easy and affordable for any organization to deploy their own VidyoConferencing solution. Vidyo supports both H.264 and H.263 video conferencing, as well as G.711, G.722, SIP and H.323 signaling.
- ✚ VidyoProxy™ allows the VidyoConferencing solution to be firewall-friendly and readily amenable to the constraints of your existing network policies.
- ✚ VidyoVoice™ is a service that enables voice-only participants to join Vidyo conferences via their wire-line or mobile phones without the need for additional equipment in your network.
